Viva is one of the largest Indian manufacturers of Aluminum Composite Panels and its accessories.

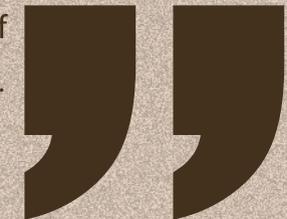

Located at Umbergaon in Gujarat, it boasts state-of-the-art Korean technology, with 6 production lines. It has a production capacity of 7 million m² per annum. The production facility is equipped with safety measures of six sigma and solar power generators for uninterrupted production.

Viva warrants that its products are free from manufacturing defects and they are fit and suitable for usual purpose. The product should be inspected prior to installation and our liability will be limited to the cost of product only.

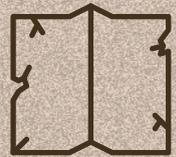

About Metal Abstract Panels

The “**Metal Abstract Series**” is created to meet the fast pace changing needs of modern architecture. It is known for features like rough finishes and tolerance to weather.

These panels come with 15 years of warranty because of its PVDF coating and advanced manufacturing technology.

Advantages of **Metal Abstract Panels**

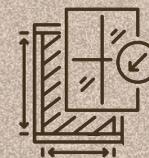

Rugged finish

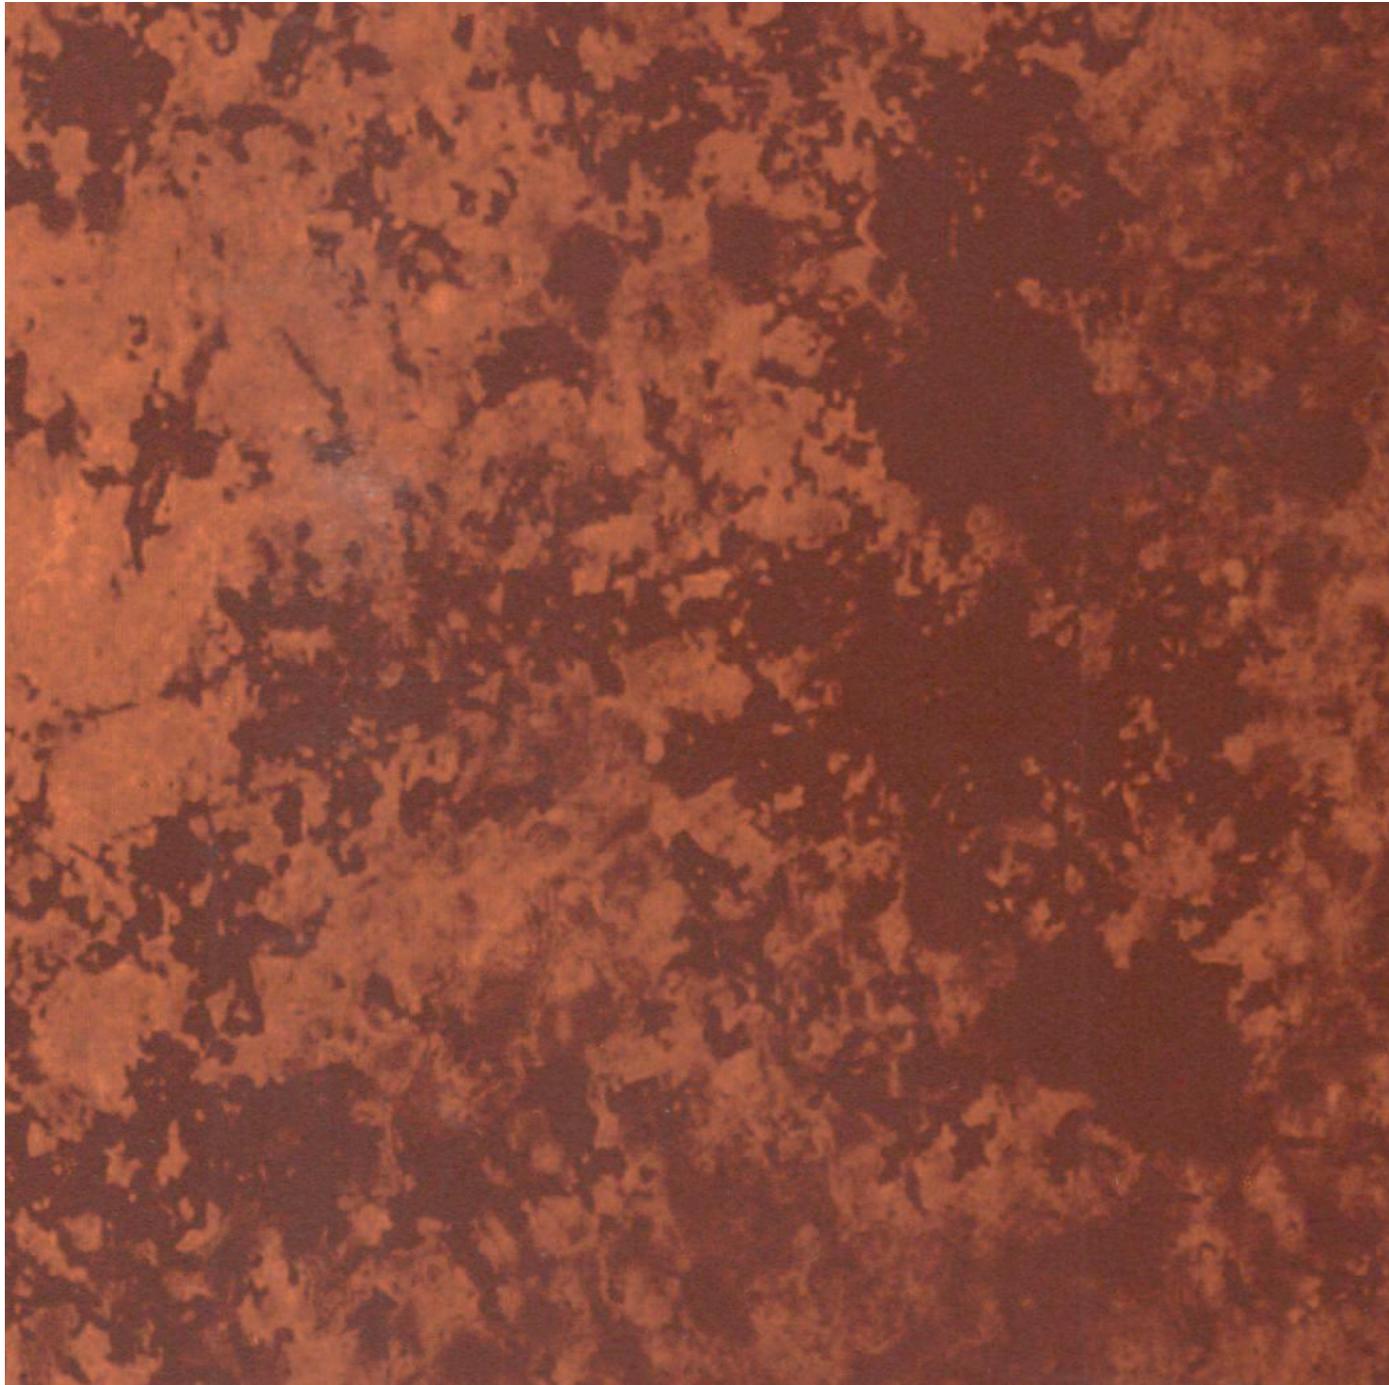

15 years
warranty

and maintain

VA 8014
CORTEN STEEL 1

01

Naturally Classy

The shade is the initial inspiration for COR-TEN steel, although the pattern and hue are more similar to rusted iron. The brown rusting layer that appears on the iron, is created with a mix of reddish-brown and has a green undertone. If you are interested in creating destroyed art as an exterior facade and experimenting with modern design in the interior, this shade is to go for. It celebrates the beauty of imperfection in its authentic form.

CORTEN STEEL 2

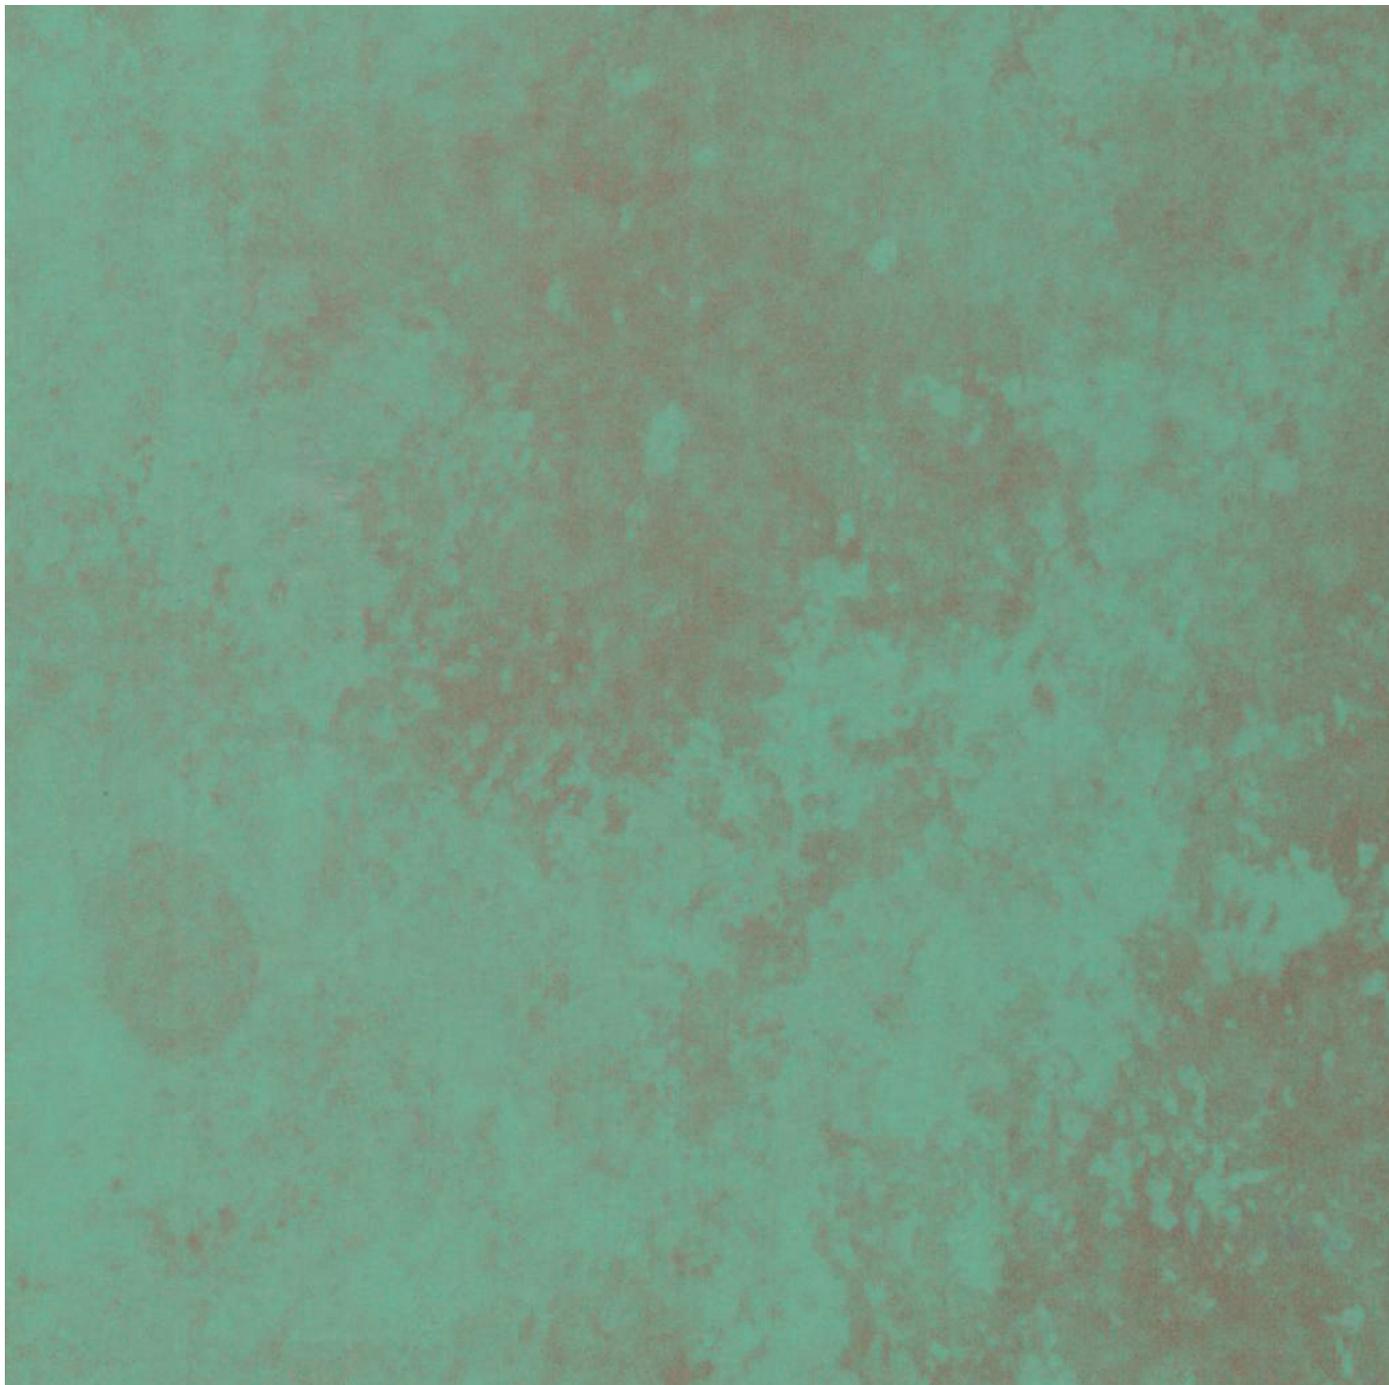

Classic Elegance

VA 8016
CORTEN STEEL 2

The shade that reflects the beauty of weathering in the panel. Inspired by COR-TEN steel, the panels give a vintage look to exteriors. The colour mimics the rusting of panel with shades of black, brown and red

VA 8015
PATINA

03

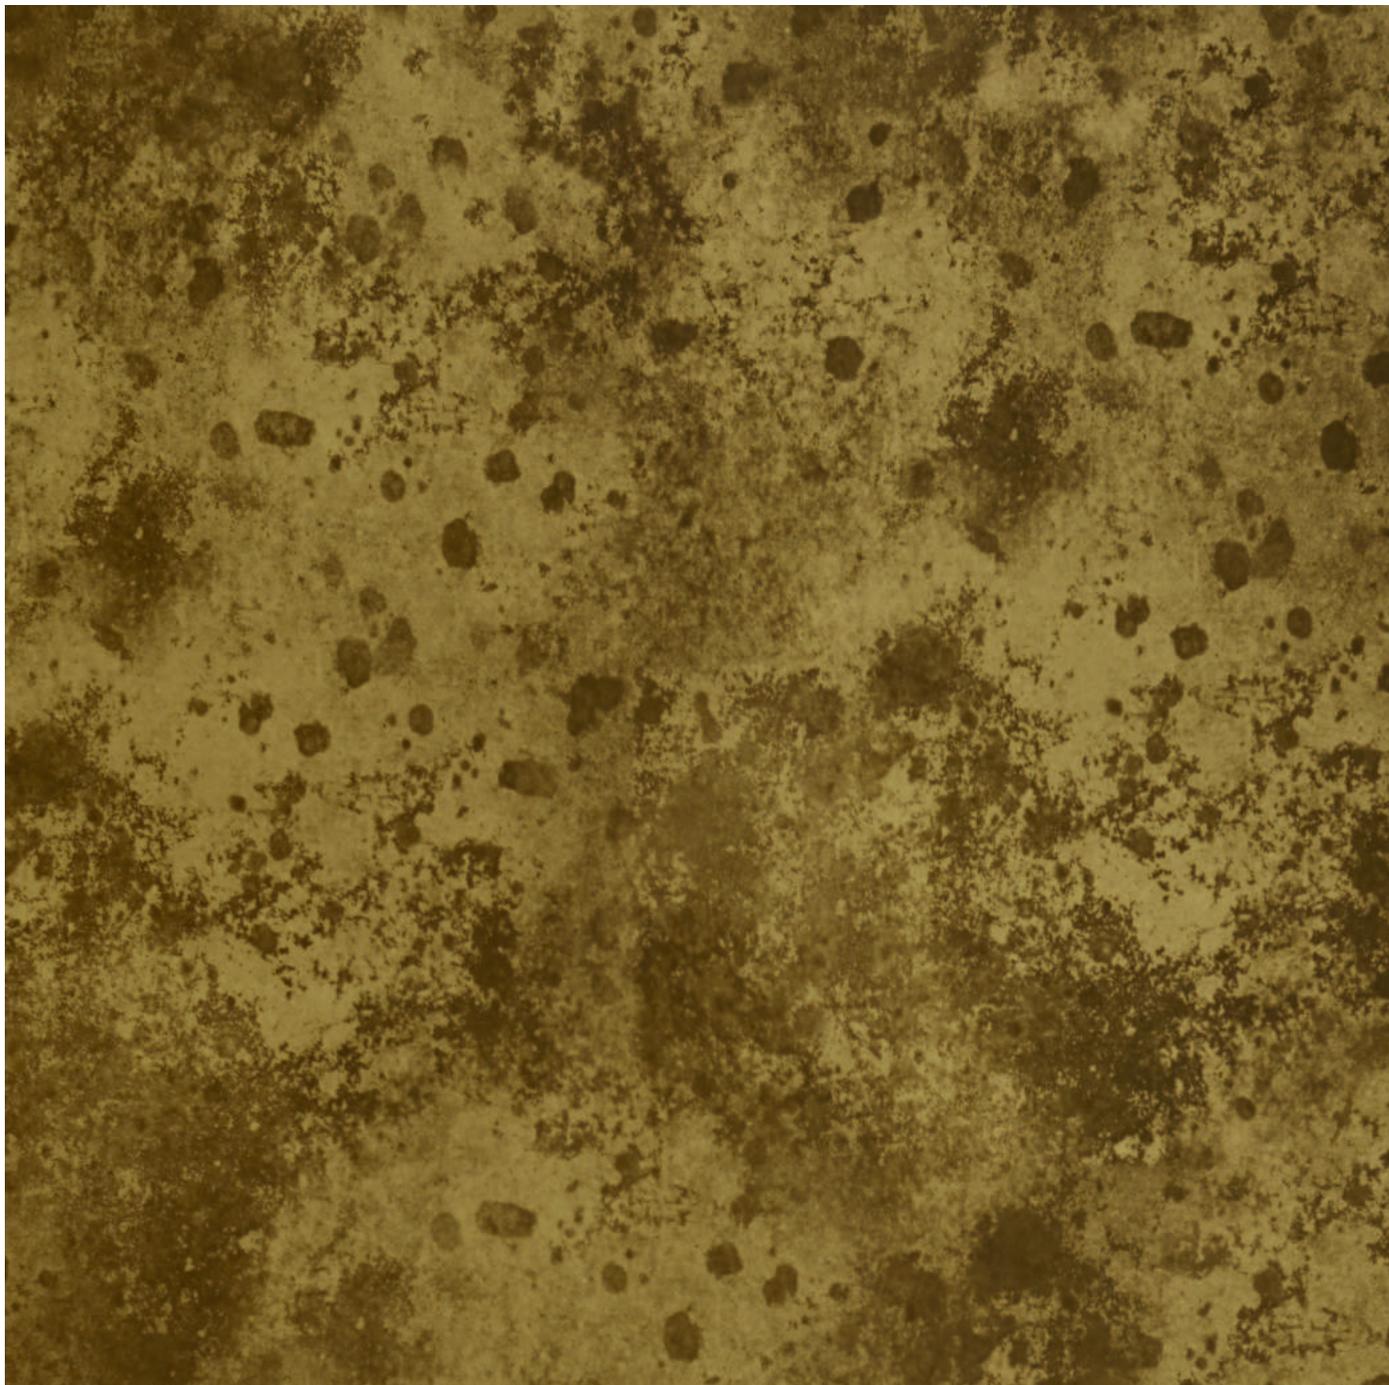

The Striking Beauty

Patina is the color that defines and reflects the shades of metal oxidation which happens due to weathering. To recognize the beauty of weathering in metal, we have created a shade that architects and designers can use to replicate the same texture and finish in modern architecture.

BROWN AGATE METAL

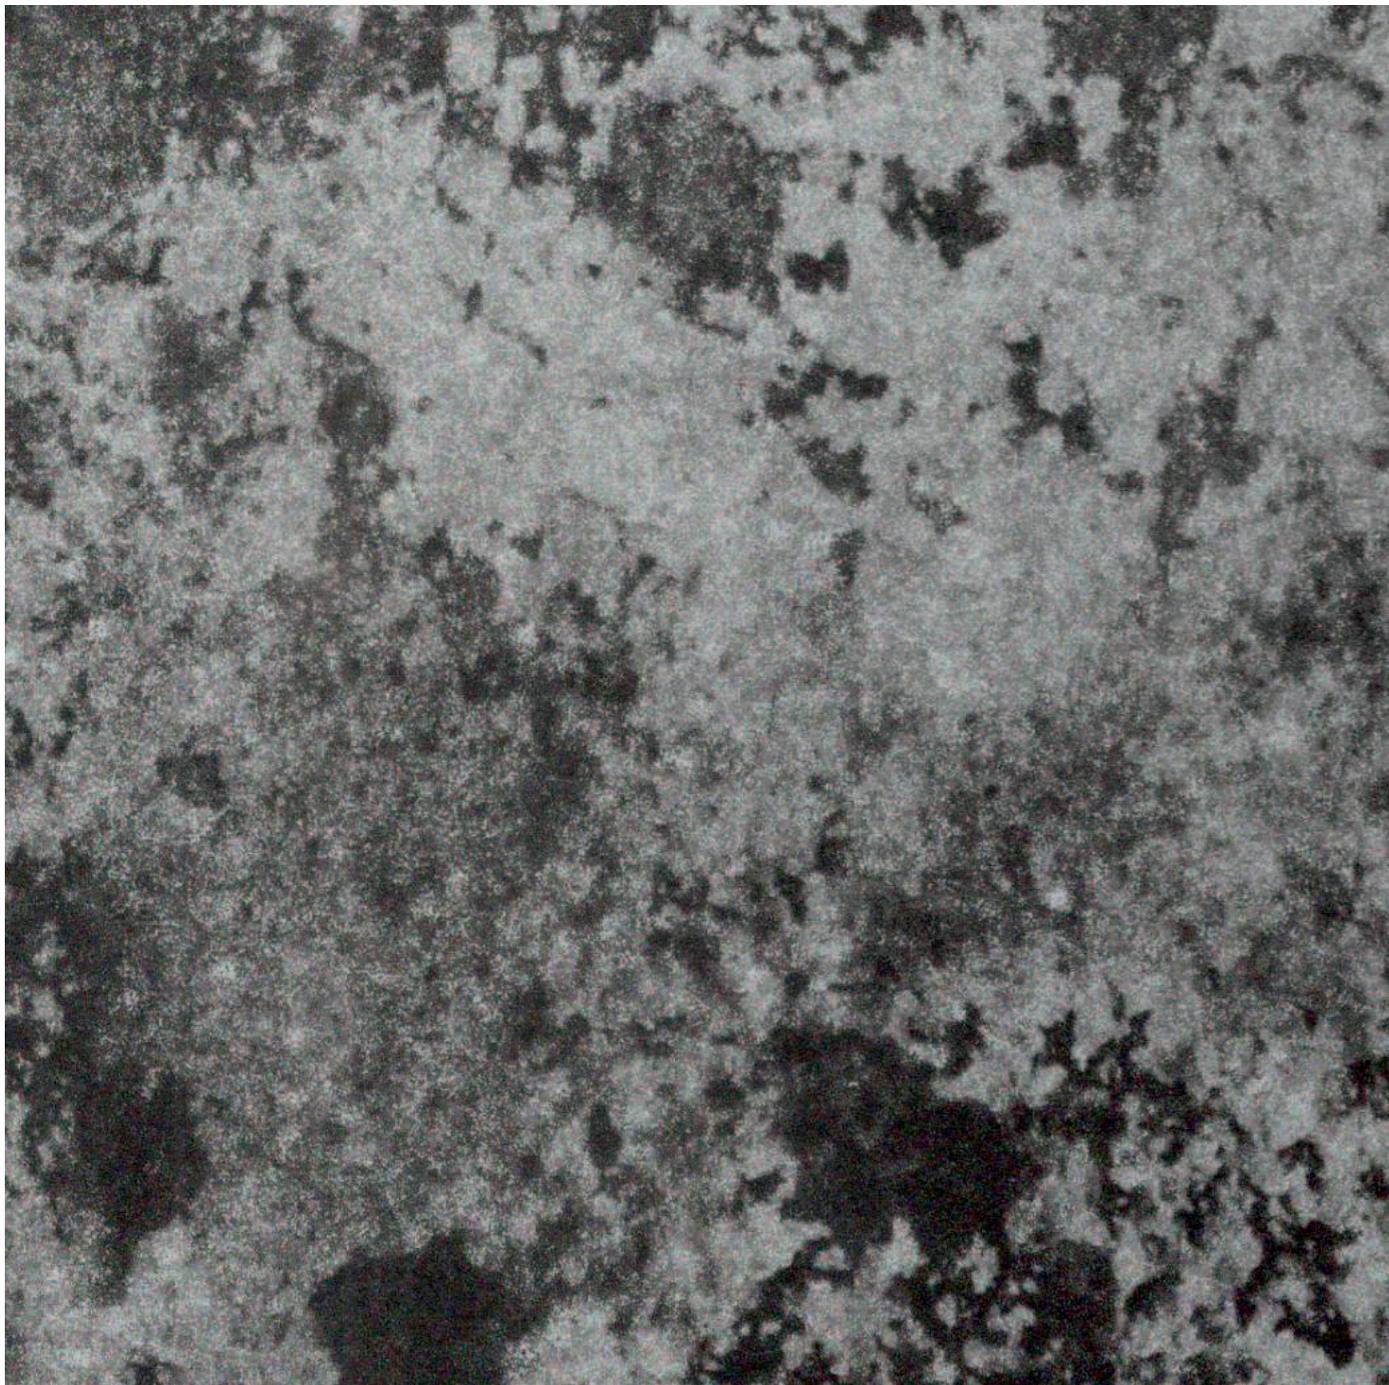

04

The Timeless Experience

VA 8005
BROWN AGATE METAL

Brown Agate Metal has the melody of yellow and green as an undertone to create a unique brown tint. The patches of dark brown and yellow-greenish tone are similar to golden soil found in the western part of Rajasthan. It will have a lasting impact on your home.

VA 8002
NAUTICA BLACK

05

Set Sail to your Dreams

Black has a powerful effect on architecture, as it is the colour that defines prominence and spirituality. The black with an undertone of white/grey help in creating a multilayered structure. The mix of dark and light shades makes it an excellent choice for refurbishing modern architecture, especially for ceilings or wall panelling.

VA 8012
STORM SWIRL

The Swirl of Creativity & Elegance

VA 8012
STORM SWIRL

Made from the inspiration of hurricanes and tornadoes, where colors like yellow, orange, and red are in a swirl to create a storm swirl of brown color. It helps designers to create the pragmatic design with realms of artistic beauty. It has a vintage celestial shade that gives justice to the vintage and rustic facade.
